Office Action Summary	Application No. 10/690,118	Applicant(s) ALBANEZE-WALKER ET AL.	
	Examiner Bernard Dentz	Art Unit 1625	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Li et al, US Patent 6,677,351. The same general synthesis of the same compounds is disclosed in Scheme 2. See col. 23 and 24 where a 1-(leaving group substituted phenyl)naphthyridin-4-one -3-carboxylic acid ester is condensed with a leaving group substituted aryl compound to create a 1-(arylphenyl)naphthyridin-4-one-3-carboxylic acid ester. In the instant case the boronic leaving group is attached to the former while in the reference it is attached to the latter. One of ordinary skill with the reference in front of him would find it obvious to reverse the attachment.

See Ex. 45 at col. 35 and 36 and col. 73 and 74 for the synthesis of the specific compound made in the process of the instant claims.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Independent claim 1 recites a step on the way to making the N-cyclopropyl-substituted naphthyridine-3-carboxamide product recited therein but does not recite how the product of said step is converted into said product.

Art Unit: 1625

The same is true of independent claim 11. Further compound of Formula VIII is recited therein, but its structure is omitted from said claim.
